

Framing Contractor Photo Checklist

Framing defines the structure of every building — and once drywall goes up, the stud spacing, header sizes, shear nailing, and blocking all become invisible. When a structural engineer reviews the job, an inspector asks questions, or a GC disputes scope, the question is always the same: **can you prove the framing was built to plan, nailed to spec, and passed inspection?** This guide gives your crew the exact shots to capture on every frame.

THE 7 PHASES

Document Every Phase, Protect Every Job

01 PHASE Pre-Frame Site Assessment

- Foundation or slab condition documented
- Foundation level — high/low points noted
- Engineered lumber (LVL/PSL) labels
- Sill plate anchor bolt spacing & size
- Approved framing plans on-site
- Existing structure condition noted
- Sill plate pressure-treated confirmed
- Material delivery — lumber grade & size
- Utility stub-up locations documented

02 PHASE Floor Framing

- Beam size & bearing support
- Blocking at bearing points
- Subfloor fastener pattern
- Floor joist size, spacing & direction
- Rim joist installation
- Subfloor adhesive applied
- Joist hanger type & nailing
- Subfloor — material & thickness
- Floor flat — wide shot before walls

03 PHASE Wall Framing

- Plate size & layout per plan
- Double top plate — lap & nailing
- King, jack & cripple stud count
- Stud size & spacing — 16" or 24" OC
- Window & door rough opening sizes
- Shear wall panel location & nailing
- Corner framing configuration
- Header size at each opening
- Walls plumb & aligned — wide shot

04 PHASE Roof Framing

- | | | |
|---|---|---|
| <input type="checkbox"/> Rafter size & spacing per plan | <input type="checkbox"/> Ridge board or ridge beam size | <input type="checkbox"/> Ridge beam support post & connection |
| <input type="checkbox"/> Rafter seat cut — plumb & level | <input type="checkbox"/> Collar ties or rafter ties installed | <input type="checkbox"/> Ceiling joist size & direction |
| <input type="checkbox"/> Hip, valley & jack rafter layout | <input type="checkbox"/> Truss installation & bracing (if used) | <input type="checkbox"/> Roof framing complete — wide shot |

05 PHASE Shear & Structural Connections

- | | | |
|---|--|---|
| <input type="checkbox"/> Shear panel type & thickness labeled | <input type="checkbox"/> Shear nailing pattern — nail size & spacing | <input type="checkbox"/> Hold-down hardware — size & location |
| <input type="checkbox"/> Anchor bolt connections at plate | <input type="checkbox"/> Simpson or structural connector type | <input type="checkbox"/> Moment frame or post base hardware |
| <input type="checkbox"/> Drag strut blocking & nailing | <input type="checkbox"/> Diaphragm blocking at shear panels | <input type="checkbox"/> All structural hardware — connection shots |

06 PHASE Blocking & Backing

- | | | |
|---|--|--|
| <input type="checkbox"/> Backing for cabinets — height documented | <input type="checkbox"/> Backing for grab bars — height & material | <input type="checkbox"/> Backing for TV mounts noted |
| <input type="checkbox"/> Fire blocking at all penetrations | <input type="checkbox"/> Fire blocking at floor-wall intersections | <input type="checkbox"/> Blocking at stair stringers |
| <input type="checkbox"/> Ceiling backing for heavy fixtures | <input type="checkbox"/> Backing at exterior ledger connections | <input type="checkbox"/> All blocking — before drywall covers it |

07 PHASE Framing Inspection & Closeout

- | | | |
|---|---|--|
| <input type="checkbox"/> Permit card on-site | <input type="checkbox"/> Framing inspection approval documented | <input type="checkbox"/> All headers & posts per plan |
| <input type="checkbox"/> Notch & hole limits not exceeded | <input type="checkbox"/> Nail plates on all penetrations | <input type="checkbox"/> Stairway framing — rise & run |
| <input type="checkbox"/> Wide shot — all framing complete | <input type="checkbox"/> GC or owner walkthrough documented | <input type="checkbox"/> As-built notes on any plan deviations |

HOW TO USE THIS IN THE FIELD

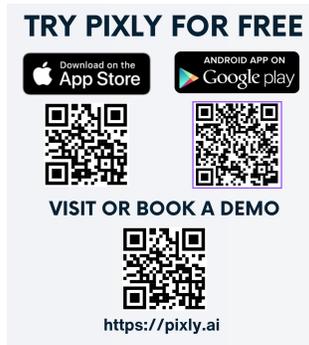

Turn This Checklist Into Your Daily Workflow

- 01 Photograph Shear Nailing Before Sheathing Goes Over It**
Shear panel nailing pattern, nail size, and edge distance are invisible once the next layer goes on. These shots are your only defense if a structural issue arises later.
- 02 Capture Every Structural Connector**
Hold-downs, post bases, rafter ties, and joist hangers are required by the structural plans. Document each one before it is covered by insulation, drywall, or finish material.
- 03 Document All Blocking Before Drywall**
Cabinet backing, grab bar blocking, and fire blocking disappear behind drywall immediately. These are the shots that prevent costly callbacks and disputed change orders.
- 04 Wide Shot at Every Phase Completion**
Floor, walls, and roof framing each deserve a wide-angle completion shot. These images document your scope clearly for the GC, lender, and inspector.
